

Xiaojian Wang

BROOKHAVEN NATIONAL LABORATORY

I have enjoyed the pleasure of participating in the BNL ASAP organization since October of 2008. I have decided to become involved further and try my best to attract more students and post-docs in order to increase the social network at BNL.

I feel, as a team, we can improve the quality of life for our students and post-docs through these social activities so there is less boredom and isolation. It would be my pleasure to help others enjoy the benefits of this organization as I have.
