

**Ofei Mante**

Brookhaven National Laboratory

My name is Ofei Mante, and I am a Research Associate in the Sustainable Energy Technologies Department at BNL. I obtained my Ph.D. in Biological Systems Engineering from Virginia Tech. I earned my B.S. in chemical Engineering from Kwame Nkrumah University of Science and Technology, Ghana. I love bowling, playing board games, travelling, listening to music and photography.

I enjoy helping with various activities that are geared towards career advancement and personal development. I am glad I was part of the team that organized the inaugural BNL Young Researcher's Symposium. I would love to see ASAP championing a variety of these programs to meet the social and professional needs of all post-docs and students.
