

**Marta Kowalczyk**

**Brookhaven National Laboratory**

I joined BNL in April 2013 as a research associate in the Chemistry Department.

I graduated with my M. Sc. from A. Mickiewicz University, in Poznan, Poland and received my Ph.D. from the City University of New York, CUNY, in Queens, New York.

I would like to help keep ASAP being a great community for young scientists. My goal is to create the opportunities to get involved in scientific and social events at the lab. I would like to help postdocs and their families' transition into community. As a member of the ASAP board, I will work towards increasing the professional development and carries resources.
