

Dhananjay Ravikumar

Brookhaven National Laboratory

I'm a PhD student in Mechanical Engineering at Stony Brook University. Since October of 2014, I've been working with Cryogenics team in the Collider-Accelerator Department at BNL. Before this, I did a Master's degree in Theoretical Physics at the University of Glasgow and a Bachelor's degree in Mechanical Engineering from India.

I find ASAP a very interesting platform to meet contemporaries, share ideas and getting to know the current generation of scientists and being a member of the board I feel will have me in the center of all of this rather than just viewing as a spectator.
